It is situated in the northeast of the North Plain in China, about 120 kilometers away from the country's capital city of Beijing.

A major access to the sea in north China, Tianjin has throughout history been an important channel of river and sea transport. As early as in the mid-19th century, it was opened as a trading port, and constant development over the years has made it an important international port and a hub of finance and commerce. The city is conveniently accessible, with well-built facilities for traffic on land, at sea and in the air. Behind, it has a vast hinterland of over two million square kilometers. Externally, it keeps trade contacts with more than 400 harbors of over 180 countries and regions, with a cargo handling capacity exceeding 450 million tons, which ranks the city at the fourth place in the world, and a standard container handling capacity of 11.58 million, standing at the 11th place in the world. Tianjin Binhai International Airport is the largest air transport hub in north China and a major freight distributing center in northeast Asia.

First built over 600 years ago, Tianjin is renowned for its splendid history and culture, boasting more than 100 “firsts” in the history of modern China. In recognition of its rich legacy of historical and cultural relics and remains, the city is reputed as “an epitome of modern China in the past hundred years”. Tianjin is also acclaimed as “an expo of western-style architectures”, with a total of 710 of its exotic buildings identified to be put under protection and preservation. Yang Liu Qing New Year Pictures, Zhang’s Painted Clay Figurines and Wei’s Kites are some of its folk arts known all over the country. A cradle of talented cross-talkers and opera performers, it is called “a center of Peking Opera” and “the land of northern Chinese folk arts”. It is also the birthplace of the modern drama in China.

Tianjin is among the first cities recognized as the country’s most outstanding tourist destinations. Natural tourism resources abound, including mountains, rivers, lakes, sea, springs, wetland, and so on. Representative natural landscapes and places of historical and cultural interests include the scenic spot in Jixian County, the sea-front, the Drum Tower commercial and business street, the Western-style buildings along Wu Da Dao, the Italian-style street, the ancient culture street, the food street, the Tong Luo Wan tourist area in the heart of the city, to name just a few.

Tianjin is an economic center undergoing booming development. As far as the past five years are concerned, the city witnessed a growth of over 16% in gross output value year-on-year to exceed 1 trillion yuan, which translated into a per capita value of 13,000 US dollars. The Binhai New Area, where the national strategic opening-up and development program is being fully implemented, is fast growing to be a new power in driving the regional economy. Construction of a more livable and eco-friendly city is proceeding fast, with its unique style taking shape, characterized by a grandeur and glamour in its integration of Chinese and Western elements, and a blend of both ancient and modern. In conformity with its positioning by the central authorities, Tianjin is well on the way to becoming an international port city, an economic center in north China and an eco-friendly community.
